🔧 SKILLS

Languages

JavaScript, TypeScript, Java, Python, GoLang, C#

Frameworks

Spring Boot, React.js, Node.js, Express.js, .NET

Databases & ORM

MySQL, MSSQL, MongoDB Atlas, JPA, Hibernate

Cloud & DevOps

AWS EC2, API Gateway, Vercel, Docker, GitHub Actions, systemd

Security & Auth

JWT, Google OAuth, Email Verification, RBAC

Testing

JUnit, Mockito, Selenium

📁 PROJECTS

SkillSync 🔗 (Automated Talent Skill-Validator)

Users: Admins/Recruiters & Candidates

Features:

- Admins can register organizations, invite candidates, create quiz/coding assessments, assign tests, and review results.
- Candidates can view assigned assessments, run code, submit answers, and view score, feedback, output, and errors after grading.
- Docker-based secure code execution supports Java, JavaScript, and Python with controlled runtime limits.
- Implemented JWT auth, email verification, password reset, Google OAuth, role-based access, and multi-tenant organization scoping.
- AI-assisted assessment generator for admins to draft quiz/coding challenges before review and publishing.

Tools/Technologies: Java 17, Spring Boot, React.js, MongoDB Atlas, Docker, AWS EC2, API Gateway, Vercel, JWT, Google OAuth.

🎓 EDUCATION

MS in Data Science,

NED University of Engineering & Technology

January 2025 -- Present

Bachelors of Science in Computer Science,

MUHAMMAD ALI JINNAH UNIVERSITY

November 2019 -- June 2023

💼 PROFESSIONAL EXPERIENCE

Workstream Automation Ltd.,

SOFTWARE DEVELOPER

December 2023 -- present

Squirrel 🔗 Project:

An interactive app for tracking and managing clients meeting, and give insight of user KPIs Scorecards and many more.

- Designed & maintained database for dynamic queries for thousands of user in most efficient way.
- Developed Bank related calculations Procedures & Triggers. (such as Scorecards)

WRA 🔗 (Product):

It is designed on an agile environment that enables rapid and cost-effective business process design, automation, and monitoring.

- Programmed rule based functions as per the product requirement by the end-user.
- Maintaining the native application and enhanced plugin features according to the requirement as per the client need.

Workmaster 🔗 (Product):

Workmaster is the faster, no code app platform for everyone -- whether you're an entrepreneur or a small business owner. You can start by building your free app in 3 easy steps, no coding required.

- Engineered a scalable multi-provider billing architecture integrating Stripe to manage complex credit-based metering. Developed automated pipelines to track and reconcile real-time consumption data from Azure Cloud and OpenRouter, ensuring 100% billing accuracy and seamless user provisioning.
- Built the custom domain and subdomain provisioning system for Workmaster apps, giving free and paid users dedicated Workmaster subdomain URLs while enabling paid users to connect and manage their own branded domains.
